Deadline: Oct. 3rd, 2017

Abstract: The scientific understanding of the human influence on the climate system has never been more essential to our wellbeing but often faces indifference and even antipathy. Why does climate science often meet resistance and what might we do in response?

Speaker Bio: As Director of Global Change Initiatives at the Science Museum of Minnesota, Patrick Hamilton develops projects that investigate the challenges and opportunities of humanity as the dominant agent of global change. In addition to his responsibilities at the Museum, Patrick also is a Board Member of District Energy St. Paul, a Principal Investigator with the University of Minnesota's Urban Heat Island Network, and a Fellow of the University of Minnesota's Institute on the Environment. Away from the Museum, Patrick and his wife J. like to kayak and grow organic, blue-ribbon-winning plums, peaches and pears in Saint Paul.
